

Carver is Committed to Achieving Sustainability and Quality-of-Life Goals By Becoming a GreenStep City

The City Council passed a resolution at their January 21 meeting entering Carver into the statewide GreenStep Cities program. GreenStep Cities is a voluntary, self-paced program that encourages cities to define and achieve sustainability and quality of life goals for residents and the community. The City has been operating with many of the program's best practices in day-to-day operations prior to joining the program and GreenStep Cities allows Carver to be part of a large network of communities and resources in the program. Best practices of the program focus on areas like designing for natural resource conservation, efficient stormwater management, and improvements to parks and trails.

Additional information about the program can be found at greenstep.pca.state.mn.us.

Keep Yourself and Your Neighbors Safe – Clear a Path Around Your Neighborhood Fire Hydrants

Carver Public Services and Carver Fire Department would like to remind residents that it is very important to keep hydrants free from the obstruction of snow and ice. When shoveling or pushing snow off driveways, take time to clear the snow from around neighborhood fire hydrants, clearing at least a three-foot radius. During a fire, seconds count. The extra time spent removing snow from around fire hydrants may save your neighbor's home or your own.

Clear a three-foot perimeter around the hydrants in your neighborhood.

Carver Fire Department is hiring Paid On Call Firefighters – See Page 4 for more details.
